CCR No. 97-0950	Logged Date 6/12/97	Rev. -	Request Type CCR
Priority Routine <input type="checkbox"/> Urgent <input checked="" type="checkbox"/> Emergency <input type="checkbox"/>	Affected Release		Change Class II
Title Implementation of Release B directory structure and Netscape Enterprise Server installation & administration on Server cheyenne			
Documents Affected		Source Nos (RID, NCR, etc.) or Tech Reference	
RTM Change <input type="checkbox"/> Start New Baseline <input type="checkbox"/>			
Problem 1) Release B directory structure needs to be installed on server cheyenne. 2) Netscape Enterprise Server (NES) needs to be installed in the nes/ directory. 3) Administration of this NES with low port numbers requires sudoroot privileges.			
Proposed Solution Contact persons: Minnie Wong 1) The HTSC Help Desk installs Release B directory structure on server cheyenne. 2) The HTSC Help Desk installs a licensed Netscape Enterprise Server in directory /usr/ecs/OPS/COTS/nes/ which is part of the Release B directory structure. The following ports are created: 443 and 444 for secure, 808, 809 and 810 for non-secure, and 8080 for admin port (Ouyang Baseline). HTSC sets the UID bit so that users can start/stop servers from command line. HTSC changes /etc/inittab so servers (all ports) will start automatically when machines are rebooted. /cgi-bin/ is remapped to /usr/ecs/OPS/CUSTOM/cgi-bin/<subsystem>, document root is set to /usr/ecs/OPS/CUSTOM/docs/WWW/<subsystem> 3) HTSC creates a webadmin account for Minnie Wong with sudoroot permissions to administer all servers on cheyenne.
